IT services that drives your business

Rayonsoft Technologies offers a full range of IT services, including business solutions, IT consulting, strategic team building, and outsourcing. Consulting services at Rayonsoft offers a strategic partnership based on the experience and trust we gained in past several years with our clients. We at Rayonsoft, don't pretend to know an organization better than our clients; however, we do provide objective insights, challenge current business process and help advance our client's business by utilizing our technical expertise. We don't tell our clients what to do; instead, we help them to develop solutions, based on our collective knowledge and experience, then we work together to make it happen. Our end-to-end services, process-based approaches and methodologies to address key business priorities such as cost competitiveness, differentiation, and growth by improving key processes and, ultimately, by helping clients achieve high performance.

reliable services for your business growth

RAYONSOFT PROVIDES TOTAL END TO END CONSULTING SERVICES.

IT CONSULTING SERVICES

In recent years Information Technology has played a valuable role in every business growth, and most of the market leaders are focusing on re-architecting their business to take advantage of evolving technologies and e-communication. As a technology partner we at Rayonsoft, help our clients to provide resources who can understand their business needs and develop a technology model that can help towards their business growth and help them to compete with the market.

At Rayonsoft, we recruit best talents in the industry with right experience and domain knowledge to provide best services to our clients. Whether you need a skilled Business Analyst who understands and coverts the business requirements to a Business Process Model, a highly experienced Solution Architect who convert the business process to a Technology Model, or a technically sound developer who converts the Technology Model to Application Model, Rayonsoft provides the best IT consultants you need for all phases of the software development life cycle.

BUSINESS PROCESS OUTSOURCING

With the globalization of business and improved infrastructure across the globe, most of the businesses have access to the low cost skilled resources. Rayonsoft offers its state of the art offshore technology center in Noida, an established IT hub in India, with a high availability infrastructure and skilled resources to our clients to have virtually their own low cost offshore development center. We help our clients to build their own offshore team from a large pool of highly skilled and trained professionals so that they can reduce the cost of their business processes that eventually helps the clients to expand their business further. We provide following services at our offshore center:

- Application Development & Maintenance
- QA and Testing Services
- Deployment and installation support

PROCESS RE-ENGINEERING

The effective use of Information Technology plays a crucial role in improving performance and efficiency of most of the business processes. Our experienced business analyst group work closely with clients to understand their business process and help them to utilize technology solutions for improved and reliable information flow.

STRATIGIC TEAM BUILDING

Building a right team is the first step for the success of any project. Our skilled associates play a strategic role in organizations of all sizes, enabling them to meet their customer's changing needs and respond to fluctuations in business cycles utilizing a supplemental workforce is a proven time-saving, cost-effective solution that allows your company to focus on its core business.

MANAGED SERVICES

Rayonsoft Application Managed Services is an outcome-based team that employs an adaptable and transparent engagement model and delivers results based on a defined scope of work for a predictable, fixed price. The team provides end-to-end management for applications, helping clients to reduce their total cost of ownership, improve service quality, and enable business growth through innovation.

Technology that works for your business

Today business is driven by rapidly evolving technology and improved infrastructure that makes it difficult to see through the future and to decide which technology is right for your business. Technology group at Rayonsoft has expertise of highly skilled analysts and software professionals who have the intelligence of finding the right solution and the experience of implementing the technology model that works best for your business.

Our highly skilled technology group transforms the technology model into a most effective business solution targeted for revenue growth, high productivity, cost reduction, and highly reliable information flow.
